

No learner left behind

Identify hidden learning needs, personalised support and transform learner attainment.

Join the mission to help every learner reach their full potential through cognitive assessment.

The growing Cognassist community includes hundreds of the UK's best employers, universities, colleges and learning providers.

Cognassist supports 1,000s of learners each year.

Cognassist supports learners from age 14 and up. Whether studying at a school, college or with an independent training provider, they're at hand to help support learners from enrolment to end-point assessments.

Whether studying at level 2, level 7 or anything in between, Cognassist know that providing learners of all levels, with the right support, is an important priority for a successful learner journey and outcome.

In addition to supporting learners on full or part-time courses, the Cognassist platform is also designed to meet the needs of learners on shorter programmes in adult education.

Cognassist provide a range of tools to help transform learner outcomes:

- a digital cognitive assessment
- personalised learner journeys
- neurodiversity training

"Cognassist plays a huge part in the success of our learners.

We wouldn't be without it."
